VACUUM LEAK TESTERS

Dinkelberg analytics is YOUR DEVELOPER FOR VACUUM LEAK TESTERS to test packagings of any kind. We have been successfully developing and selling leak testers for years and can thus not only offer you standard equipment but also give you expert advice on your individual wishes and requirements!

Manufacturing of custom-made devices – tailored to your needs!

VACUUM LEAK TESTERS are indispensable in the **PHARMACEUTICAL AND FOOD INDUSTRY**. Packaging testers by **DINKELBERG ANALYTICS** are suitable for reproducible leak testing of closures and seals of various packaging materials and are characterized by their high quality **TEST CHAMBER MADE OF ACRYLIC GLAS (PMMA)**. After applying the vacuum, leaks can be detected quickly and safely by the rising of air bubbles. In our product portfolio you can also find **DIGITAL LEAK TESTERS**. This extended basic model is just as suitable for standard examinations as it is for research and development tasks.

Method:

With the standard method, the test vessel is filled with water and the package to be tested is placed under the height-adjustable immersion plate. After applying a vacuum, leaks can be detected quickly and reliably by the rising of air bubbles.

Vacuum and test duration can be set individually - automatic ventilation takes place at the end of the test.
